Organization

- ❖ Conference organized by the International College of Person-centered Medicine in collaboration with the World Health Organization, World Medical Association, International Council of Nurses, International Alliance of Patients' Organizations, and other top global medical and health bodies.
- ❖ The Conference main theme will be Person-centered Health Research. In connection with this, ten thematic symposia will be held covering various aspects of person-centered research on conceptual issues, clinical care and public health. A special session on Ethical Standards for Research will also be held. A Geneva Declaration on Person-centered Health Research will be organized as well.
- ❖ Expected participants will be clinicians and scholars in medicine and related health disciplines as well as other interested individuals. ICPCM Continuing Professional Development (CME) Certificates will be e-mailed upon request to all registered participants.
- ❖ For further information please visit www.personcenteredmedicine.org and write to ICPCMsecretariat@aol.com.
